

This table documents the ICD-10-derived hospital-admission outcome variables generated during data preparation, including their definitions, included and excluded ICD-10 codes, and their use in the final analyses:

ICD-10-Derived Outcome Variable Dictionary

Overarching Category	Variable	Description / Focus	Included ICD-10 Codes	Excluded ICD-10 Codes
All-cause hospital admissions	All-cause	All inpatient treatment cases with a valid principal diagnosis	All valid ICD-10 chapters	Unknown principal diagnosis
Infectious Diseases	Infect_par	Certain infectious and parasitic diseases	A00–B99	–
Respiratory System	Resp_0	Diseases of the respiratory system (Total)	J00–J99	–
	Resp_1	Acute respiratory infections	J00–J29	–
	Resp_2	Respiratory diseases (specific filter)	J00–J99	J20–J39
Circulatory System	Card_0	Diseases of the circulatory system (Total)	I00–I99	–
	Card_1	Hypertension and heart failure	I10–I15, I50–I59	–
	Card_2	Circulatory diseases (restricted)	I00–I99	I00–I09, I30–I39
Mental Disorders	Ment_0	Mental and behavioral disorders (Total)	F00–F99	–
	Ment_1	Organic and schizophrenic disorders	F00–F09, F20–F29	–
Genitourinary System	Uri_0	Diseases of the genitourinary system (Total)	N00–N99	–
	Uri_1	Tubulo-interstitial diseases	N10–N19	–
	Uri_2	Glomerular and interstitial diseases	N00–N19	–
Other	Other	Remaining diagnosis chapters	All other ICD chapters	–

Note. Cause-specific categories were defined according to the primary diagnosis and were mutually exclusive. All-cause admissions included all cases with a valid primary diagnosis.
